Enterprise Governance of Information Technology: Achieving Strategic Alignment and Value Wim Van Grembergen, Steven De Haes

Enterprise governance of information technology is a relatively new concept that is gaining traction in both the academic and practitioner worlds. Going well beyond the implementation of a superior IT infrastructure, 'Enterprise Governance of Information Technology' is about defining and embedding processes and structures throughout the organizations that enable both business and IT people to execute their responsibilities, while maximizing the value created from their IT-enabled investments. At the forefront of the field, the authors draw from years of research and advising corporate clients to present the first comprehensive resource on the topic. Featuring numerous case examples from companies around the world, the book integrates theoretical advances and empirical data with practical application, including in-depth discussion of such frameworks as COBIT and VALIT, which are used to measure and audit the value of IT investments and ensuring regulatory compliance. A variety of elements, including executive summaries and sidebars, extensive references, and questions and activities (with additional materials available on-line) ensure that the book will be an essential resource for professionals, researchers, and students alike.

Angela Kiefer:

You can get this Enterprise Governance of Information Technology: Achieving Strategic Alignment and Value by go to the bookstore or Mall. Just viewing or reviewing it can to be your solve trouble if you get difficulties on your knowledge. Kinds of this book are various. Not only by written or printed but in addition can you enjoy this book simply by e-book. In the modern era similar to now, you just looking by your local mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose appropriate ways for you.

Richard Lawrence:

As a pupil exactly feel bored for you to reading. If their teacher requested them to go to the library or even make summary for some publication, they are complained. Just minor students that has reading's soul or real their hobby. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that examining is not important, boring as well as can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this age, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Enterprise Governance of Information Technology: Achieving Strategic Alignment and Value can make you sense more interested to read.
