Evolving Intelligent Systems: Methodology and Applications (IEEE Press Series on Computational Intelligence)

Evolving Intelligent Systems: Methodology and Applications (IEEE Press Series on Computational Intelligence)

From theory to techniques, the first all-in-one resource for EIS

There is a clear demand in advanced process industries, defense, and Internet and communication (VoIP) applications for intelligent yet adaptive/evolving systems. Evolving Intelligent Systems is the first self-contained volume that covers this newly established concept in its entirety, from a systematic methodology to case studies to industrial applications. Featuring chapters written by leading world experts, it addresses the progress, trends, and major achievements in this emerging research field, with a strong emphasis on the balance between novel theoretical results and solutions and practical real-life applications.

- Explains the following fundamental approaches for developing evolving intelligent systems (EIS):
 - the Hierarchical Prioritized Structure
 - the Participatory Learning Paradigm
 - the Evolving Takagi-Sugeno fuzzy systems (eTS+)
 - the evolving clustering algorithm that stems from the well-known Gustafson-Kessel offline clustering algorithm
- Emphasizes the importance and increased interest in online processing of data streams
- Outlines the general strategy of using the fuzzy dynamic clustering as a foundation for evolvable information granulation
- Presents a methodology for developing robust and interpretable evolving fuzzy rule-based systems
- Introduces an integrated approach to incremental (real-time) feature extraction and classification
- Proposes a study on the stability of evolving neuro-fuzzy recurrent networks
- Details methodologies for evolving clustering and classification
- Reveals different applications of EIS to address real problems in areas of:
 - evolving inferential sensors in chemical and petrochemical industry
 - learning and recognition in robotics
- Features downloadable software resources

Evolving Intelligent Systems is the one-stop reference guide for both theoretical and practical issues for computer scientists, engineers, researchers, applied mathematicians, machine learning and data mining experts, graduate students, and professionals.

Download and Read Free Online Evolving Intelligent Systems: Methodology and Applications (IEEE Press Series on Computational Intelligence)

From reader reviews:

Myrtle Hamer:

The ability that you get from Evolving Intelligent Systems: Methodology and Applications (IEEE Press Series on Computational Intelligence) will be the more deep you digging the information that hide into the words the more you get interested in reading it. It does not mean that this book is hard to be aware of but Evolving Intelligent Systems: Methodology and Applications (IEEE Press Series on Computational Intelligence) giving you thrill feeling of reading. The copy writer conveys their point in specific way that can be understood through anyone who read the idea because the author of this book is well-known enough. This book also makes your vocabulary increase well. Therefore it is easy to understand then can go with you, both in printed or e-book style are available. We highly recommend you for having that Evolving Intelligent Systems: Methodology and Applications (IEEE Press Series on Computational Intelligence) instantly.

Jerry Rivera:

Reading a e-book tends to be new life style in this era globalization. With studying you can get a lot of information that may give you benefit in your life. Together with book everyone in this world can easily share their idea. Textbooks can also inspire a lot of people. Lots of author can inspire their very own reader with their story as well as their experience. Not only the storyplot that share in the ebooks. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors on this planet always try to improve their talent in writing, they also doing some study before they write on their book. One of them is this Evolving Intelligent Systems: Methodology and Applications (IEEE Press Series on Computational Intelligence).

Gordon Rollins:

A lot of people always spent their free time to vacation or perhaps go to the outside with them family or their friend. Do you know? Many a lot of people spent they will free time just watching TV, or maybe playing video games all day long. If you wish to try to find a new activity that is look different you can read a new book. It is really fun to suit your needs. If you enjoy the book which you read you can spent the entire day to reading a guide. The book Evolving Intelligent Systems: Methodology and Applications (IEEE Press Series on Computational Intelligence) it is quite good to read. There are a lot of those who recommended this book. They were enjoying reading this book. Should you did not have enough space to bring this book you can buy the particular e-book. You can m0ore easily to read this book through your smart phone. The price is not very costly but this book possesses high quality.

Richard Mason:

What is your hobby? Have you heard in which question when you got scholars? We believe that that concern was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. And also

you know that little person such as reading or as examining become their hobby. You need to know that reading is very important in addition to book as to be the factor. Book is important thing to add you knowledge, except your teacher or lecturer. You discover good news or update with regards to something by book. Amount types of books that can you choose to adopt be your object. One of them is this Evolving Intelligent Systems: Methodology and Applications (IEEE Press Series on Computational Intelligence).
