Neuro-Ophthalmology Review Manual

Lanning B. Kline MD, Rod Foroozan MD

Neuro-Ophthalmology Review Manual Lanning B. Kline MD, Rod Foroozan MD

More than 30 years ago, **Neuro-Ophthalmology Review Manual**, presented a unique and user-friendly approach to address clinical neuro-ophthalmology principles used in everyday practice. The new **Seventh Edition** continues that tradition, providing a timely update, while also maintaining the same user-friendly and concise format.

Lanning B. Kline, MD and Rod Foroozan, MD are joined by seven contributors on this **Seventh Edition** who have organized the book to provide the essential key information on neuro-ophthalmic disorders. The inclusion of over 130 illustrations and 29 tables allows for a user-friendly format and quick access to valuable information.

The **Seventh Edition** provides a timely and comprehensive update to the current information, effective exercises, and case studies, as well as the addition of a chapter on neuroimaging.

Neuro-Ophthalmology Review Manual, Seventh Edition is a succinct text for all practitioners and residents in ophthalmology, neurology, and neurosurgery. A popular choice among colleagues for more than 30 years, this a must have resource in neuro-ophthalmology

Reviews from the past edition:

“For the doctor who sees the occasional neuro-ophthalmology patient, this book should be an excellent resource. Residents should read this book, because they can learn the subject material. The book could also be an excellent resource on a general practitioner’s shelf, because it is concise and easy to use.”

-William V. Good, Smith-Kettlewell Eye Research Institute, San Francisco, California, Optometry and Vision Science

“Overall, this is a very good introductory textbook for residents in ophthalmology and neurology and can be used as a quick reference book by practitioners in either discipline. It is still the best-sized review book available on the topic for residents preparing for their in-training exams and will continue to be a popular choice for this purpose.”

-Nurhan Torun, MD, FRCSC, Canadian Journal of Ophthalmology

From reader reviews:

Alison McGowan:

Reading a guide can be one of a lot of action that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people fantastic. First reading a guide will give you a lot of new details. When you read a guide you will get new information mainly because book is one of various ways to share the information or perhaps their idea. Second, examining a book will make a person more imaginative. When you reading through a book especially fiction book the author will bring you to definitely imagine the story how the characters do it anything. Third, you can share your knowledge to other people. When you read this Neuro-Ophthalmology Review Manual, you could tells your family, friends and also soon about yours guide. Your knowledge can inspire the others, make them reading a book.

Patricia Glover:

Many people spending their time by playing outside together with friends, fun activity using family or just watching TV the whole day. You can have new activity to pay your whole day by examining a book. Ugh, you think reading a book can actually hard because you have to use the book everywhere? It okay you can have the e-book, getting everywhere you want in your Cell phone. Like Neuro-Ophthalmology Review Manual which is getting the e-book version. So , try out this book? Let's see.

Jonathan Ownby:

As a college student exactly feel bored to be able to reading. If their teacher asked them to go to the library in order to make summary for some e-book, they are complained. Just small students that has reading's heart and soul or real their interest. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that studying is not important, boring as well as can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Neuro-Ophthalmology Review Manual can make you sense more interested to read.

Robert Marshall:

Reading a book make you to get more knowledge from it. You can take knowledge and information from the book. Book is prepared or printed or outlined from each source which filled update of news. Within this modern era like now, many ways to get information are available for an individual. From media social like newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just seeking the Neuro-Ophthalmology Review Manual when you required it?
