Advances in Apparel Production (Woodhead Publishing Series in Textiles)

Advances in Apparel Production (Woodhead Publishing Series in Textiles)

Apparel production is a complex process often involving an international supply chain which must respond rapidly to the changing needs and tastes of consumers. This important book discusses the technological improvements which are transforming the speed, flexibility and productivity of the industry.

The first part of the book reviews advances in apparel design. There are chapters on modelling fabric and garment drape, computer-aided colour matching, yarn design and pattern making. Other chapters discuss key issues in apparel sizing and fit, and the role of 3-D body scanning in improving garment fit and design. The second part of the book surveys advances in production, beginning with product development before looking at advances in knitting, sewing, printing, finishing and fabric inspection.

With its distinguished editor and international team of contributors, Advances in apparel production is a standard work for those researching and working in this important industry.

- Discusses the technological improvements transforming the speed, flexibility and productivity of the industry
- Examines computer aided colour matching, garment drape and yarn design
- Explores key issues in apparel sizing and fit, the role of three-dimensional body scanning in improving garment fit and design
