Differential Geometry of Foliations: The Fundamental Integrability Problem (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge) B.L. Reinhart

Whoever you are! How can I but offer you divine leaves . . . ? Walt Whitman The object of study in modern differential geometry is a manifold with a differential structure, and usually some additional structure as well. Thus, one is given a topological space M and a family of homeomorphisms, called coordinate systems, between open subsets of the space and open subsets of a real vector space V . It is supposed that where two domains overlap, the images are related by a diffeomorphism, called a coordinate transformation, between open subsets of V . M has associated with it a tangent bundle, which is a vector bundle with fiber V and group the general linear group $GL(V)$. The additional structures that occur include Riemannian metrics, connections, complex structures, foliations, and many more. Frequently there is associated to the structure a reduction of the group of the tangent bundle to some subgroup G of $GL(V)$. It is particularly pleasant if one can choose the coordinate systems so that the Jacobian matrices of the coordinate transformations belong to G . A reduction to G is called a G -structure, which is called integrable (or flat) if the condition on the Jacobians is satisfied. The strength of the integrability hypothesis is well-illustrated by the case of the orthogonal group O_n . An O_n -structure is given by the choice of a Riemannian metric, and therefore exists on every smooth manifold.

From reader reviews:

Gary Bloomfield:

In this 21st century, people become competitive in most way. By being competitive currently, people have do something to make these individuals survives, being in the middle of often the crowded place and notice by surrounding. One thing that occasionally many people have underestimated this for a while is reading. Yep, by reading a guide your ability to survive boost then having chance to remain than other is high. In your case who want to start reading some sort of book, we give you this particular Differential Geometry of Foliations: The Fundamental Integrability Problem (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge) book as beginning and daily reading reserve. Why, because this book is greater than just a book.

Angela Jones:

Hey guys, do you desires to finds a new book to learn? May be the book with the concept Differential Geometry of Foliations: The Fundamental Integrability Problem (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge) suitable to you? The actual book was written by well known writer in this era. The book untitled Differential Geometry of Foliations: The Fundamental Integrability Problem (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge)is the one of several books this everyone read now. This specific book was inspired lots of people in the world. When you read this guide you will enter the new age that you ever know prior to. The author explained their plan in the simple way, so all of people can easily to comprehend the core of this e-book. This book will give you a lot of information about this world now. In order to see the represented of the world with this book.

Nancy Kidder:

You can find this Differential Geometry of Foliations: The Fundamental Integrability Problem (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge) by visit the bookstore or Mall. Merely viewing or reviewing it may to be your solve issue if you get difficulties for your knowledge. Kinds of this reserve are various. Not only simply by written or printed and also can you enjoy this book simply by e-book. In the modern era just like now, you just looking by your local mobile phone and searching what your problem. Right now, choose your ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose right ways for you.

Gerald Reed:

A lot of e-book has printed but it takes a different approach. You can get it by web on social media. You can choose the best book for you, science, comedian, novel, or whatever by searching from it. It is named of book Differential Geometry of Foliations: The Fundamental Integrability Problem (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge). Contain your knowledge by it. Without leaving behind the printed book, it may add your knowledge and make a person happier to read. It is most essential that, you must aware about reserve. It can bring you from one destination to other place.
