The definitive publication of the Temple of Apollo at Bassai, in the NW Peloponnese, this is one of four volumes representing the culmination of years of study by Professor Fred Cooper of the University of Minnesota and other scholars throughout the world. An identifiable work of Iktinos, the architect of the Parthenon, the building exhibits numerous unusual and uncanonical features that heralded a revolution in Greek architectural design. Volume II contains Brian Madigan's study of the sculptural program and Cooper's analysis of the relevant parts of the entablature.
