Child Psychology: The Modern Science Ross Vasta, etc., Marshall Haith, Scott Miller

This introduction to the different stages of child development, from conception through to adolescence, emphasizes the scientific underpinnings of child psychology and takes a contextual approach. The book has a strong scientific research orientation, with a chapter on research methods and treatment of current issues. This edition has been revised to describe further cultural factors and family/school influences, new social policy applications and new questions. A study guide is available to accompany the main work.
