Research Handbook on Intellectual Property Law and Competition Law

Research Handbook on Intellectual Property Law and Competition Law

This comprehensive Handbook brings together contributions from American, Canadian, European, and Japanese writers to better explore the interface between competition and intellectual property law. Issues range from the fundamental to the specific, each considered from the angle of cartels, dominant positions, and mergers. Topics covered include, among others, technology licensing, the doctrine of exhaustion, network industries, innovation, patents, and copyright. Appropriate space is devoted to the latest developments in European and American antitrust law, such as the 'more economic approach' and the question of anti-competitive abuses of intellectual property rights. Each original chapter reflects extensive comments by all other contributors, an approach which ensures a diversity of perspectives within a systematic framework. These cutting edge articles will be of great interest to law professors and post graduate students of intellectual property and competition law, as well as those interested in innovation and competition theory, and legal practices in intellectual property and competition law.
