David L. Hall

Handbook of Multisensor Data Fusion: Theory and Practice, Second Edition (Electrical Engineering & Applied Signal Processing Series) David L. Hall

In the years since the bestselling first edition, fusion research and applications have adapted to service-oriented architectures and pushed the boundaries of situational modeling in human behavior, expanding into fields such as chemical and biological sensing, crisis management, and intelligent buildings.

Handbook of Multisensor Data Fusion: Theory and Practice, Second Edition represents the most current concepts and theory as information fusion expands into the realm of network-centric architectures. It reflects new developments in distributed and detection fusion, situation and impact awareness in complex applications, and human cognitive concepts. With contributions from the world's leading fusion experts, this second edition expands to 31 chapters covering the fundamental theory and cutting-edge developments that are driving this field.

New to the Second Edition—

- Applications in electromagnetic systems and chemical and biological sensors
- Army command and combat identification techniques
- Techniques for automated reasoning
- Advances in Kalman filtering
- Fusion in a network centric environment
- Service-oriented architecture concepts
- Intelligent agents for improved decision making
- Commercial off-the-shelf (COTS) software tools

From basic information to state-of-the-art theories, this second edition continues to be a unique, comprehensive, and up-to-date resource for data fusion systems designers.

From reader reviews:

Linda Enders:

Book is definitely written, printed, or illustrated for everything. You can learn everything you want by a guide. Book has a different type. As we know that book is important thing to bring us around the world. Adjacent to that you can your reading skill was fluently. A guide Handbook of Multisensor Data Fusion: Theory and Practice, Second Edition (Electrical Engineering & Applied Signal Processing Series) will make you to be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think in which open or reading a new book make you bored. It is far from make you fun. Why they may be thought like that? Have you trying to find best book or acceptable book with you?

Jon Cerrone:

Beside that Handbook of Multisensor Data Fusion: Theory and Practice, Second Edition (Electrical Engineering & Applied Signal Processing Series) in your phone, it may give you a way to get nearer to the new knowledge or information. The information and the knowledge you might got here is fresh through the oven so don't possibly be worry if you feel like an older people live in narrow small town. It is good thing to have Handbook of Multisensor Data Fusion: Theory and Practice, Second Edition (Electrical Engineering & Applied Signal Processing Series) because this book offers to your account readable information. Do you at times have book but you would not get what it's facts concerning. Oh come on, that wil happen if you have this inside your hand. The Enjoyable agreement here cannot be questionable, just like treasuring beautiful island. So do you still want to miss the idea? Find this book and also read it from currently!

Virginia McNally:

Within this era which is the greater individual or who has ability to do something more are more precious than other. Do you want to become considered one of it? It is just simple strategy to have that. What you have to do is just spending your time little but quite enough to experience a look at some books. One of the books in the top collection in your reading list is actually Handbook of Multisensor Data Fusion: Theory and Practice, Second Edition (Electrical Engineering & Applied Signal Processing Series). This book and that is qualified as The Hungry Hills can get you closer in turning out to be precious person. By looking right up and review this book you can get many advantages.

Chris McCree:

What is your hobby? Have you heard this question when you got students? We believe that that question was given by teacher to the students. Many kinds of hobby, All people has different hobby. And you know that little person such as reading or as reading through become their hobby. You have to know that reading is very important and also book as to be the factor. Book is important thing to include you knowledge, except your own teacher or lecturer. You will find good news or update regarding something by book. Many kinds of books that can you go onto be your object. One of them are these claims Handbook of Multisensor Data

Fusion: Theory and Practice, Second Edition (Electrical Engineering & Applied Signal Processing Series).
