**Spaces of Geographical Thought: Deconstructing Human Geography's Binaries (Society and Space S)**  
**Spaces of Geographical Thought** examines key ideas – like space and place - which inform the geographic imagination. The text explains the significance of these binaries in the constitution of geographic thought and shows how many of these binaries have been interrogated and reimagined in more recent geographical thinking.

A consideration of these binaries will define the concepts and situate students in the most current geographical arguments and debates. The text will be required reading for all modules on the philosophy of geography and on geographical theory.
