Managing Projects as Investments: Earned Value to Business Value (Industrial Innovation Series)

Stephen A. Devaux

Every project is an investment; however, traditional project management methodologies do not support assessment of the business value that enables senior management to maximize decision making. The next evolution in project management, therefore, will be to manage projects as investments. **Managing Projects as Investments: Earned Value to Business Value** provides tools and metrics to enable planning, measuring, evaluating, and optimizing projects.

This book shifts the paradigm. It builds on traditional scope-cost-schedule tools, adding a critical new focus on the expected value of projects and programs. The enhancements in processes and metrics allow senior management and PMOs to guide the entire organization on the basis of business benefits, and to ensure that decisions ranging from project selection to resource assignment facilitate those goals. The author shows how framing projects as investments enables significant improvement in project performance. He provides metrics that allow you and your team to track and maximize performance based on ROI.

Demonstrating the importance of recognizing an enabler project in a program, and why its value and cost of time are so great, the book provides the tools to determine right-sized staffing levels for project-driven organizations. It includes a comprehensive but easy-to-understand explanation of both basic and advanced earned value metrics, their shortcomings, and how they can be improved and shows you how to optimize contract terms on projects in a way that can avoid misaligned customer/contractor goals.

It should be here for anyone. So , don't miss the item! Just read this e-book type for your better life as well as knowledge.

Rebecca Muldoon:

As a student exactly feel bored for you to reading. If their teacher requested them to go to the library or to make summary for some e-book, they are complained. Just very little students that has reading's internal or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading very seriously. Any students feel that reading is not important, boring as well as can't see colorful photos on there. Yeah, it is to get complicated. Book is very important in your case.

As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Managing Projects as Investments: Earned Value to Business Value (Industrial Innovation Series) can make you feel more interested to read.
