Living on the Edge (Studies in Generative Grammar)

Living on the Edge (Studies in Generative Grammar)

This collection of papers by an international group of authors honors Jonathan Kaye's contributions to phonology by expanding some of Kaye's ideas to a variety of theoretical topics and languages. The set of ideas discussed or used in this collection includes: empty categories, licensing relationships and constraints, a restrictive two-levelled approach to phonology (without rule ordering or constraint ranking), a restrictive theory of syllabic representation (without the codas constituent and with exclusively binary branching), theories of the phonology-phonetics interface in which phonology is motivated independently of phonetics, and the metatheoretical flaws in a number of widely accepted but rarely questioned views on phonology.
