Cable Television Technology and Operations: HDTV and NTSC Systems Eugene R. Bartlett

This practical guide to the design, implementation, and maintenance of cable television systems, written for technical personnel, engineers, managers, and operators, includes an overall introduction to standard National Television Standard Committee (NTSC) and High Definition Television (HDTV) systems, outlining start-up procedures and development of the industry to the present day. The impact of new (HDTV) systems is also discussed, for the first time in any cable television book. To insure proper maintenance, readers get the latest test procedures and measurement, plus guidance on standards, records and reference data.
