Topics in Fixed Point Theory

Topics in Fixed Point Theory

The purpose of this contributed volume is to provide a primary resource for anyone interested in fixed point theory with a metric flavor. The book presents information for those wishing to find results that might apply to their own work and for those wishing to obtain a deeper understanding of the theory. The book should be of interest to a wide range of researchers in mathematical analysis as well as to those whose primary interest is the study of fixed point theory and the underlying spaces. The level of exposition is directed to a wide audience, including students and established researchers. Key topics covered include Banach contraction theorem, hyperconvex metric spaces, modular function spaces, fixed point theory in ordered sets, topological fixed point theory for set-valued maps, coincidence theorems, Lefschetz and Nielsen theories, systems of nonlinear inequalities, iterative methods for fixed point problems, and the Ekeland's variational principle.

From reader reviews:

Jeffrey Roybal:

The book untitled Topics in Fixed Point Theory is the book that recommended to you you just read. You can see the quality of the e-book content that will be shown to anyone. The language that publisher use to explained their way of doing something is easily to understand. The writer was did a lot of investigation when write the book, hence the information that they share to you is absolutely accurate. You also could possibly get the e-book of Topics in Fixed Point Theory from the publisher to make you more enjoy free time.

Jackie Caldwell:

Your reading 6th sense will not betray anyone, why because this Topics in Fixed Point Theory reserve written by well-known writer who really knows well how to make book that may be understand by anyone who all read the book. Written in good manner for you, still dripping wet every ideas and creating skill only for eliminate your hunger then you still doubt Topics in Fixed Point Theory as good book but not only by the cover but also by content. This is one reserve that can break don't determine book by its handle, so do you still needing one more sixth sense to pick that!? Oh come on your examining sixth sense already said so why you have to listening to an additional sixth sense.

Michael Garcia:

Beside this specific Topics in Fixed Point Theory in your phone, it could give you a way to get closer to the new knowledge or information. The information and the knowledge you will got here is fresh in the oven so don't be worry if you feel like an aged people live in narrow community. It is good thing to have Topics in Fixed Point Theory because this book offers for you readable information. Do you sometimes have book but you rarely get what it's facts concerning. Oh come on, that will not happen if you have this in your hand. The Enjoyable arrangement here cannot be questionable, just like treasuring beautiful island. Use you still want to miss the item? Find this book and read it from at this point!

Patricia Gagliano:

A lot of reserve has printed but it takes a different approach. You can get it by net on social media. You can choose the top book for you, science, comic, novel, or whatever by simply searching from it. It is identified as of book Topics in Fixed Point Theory. Contain your knowledge by it. Without causing the printed book, it can add your knowledge and make an individual happier to read. It is most important that, you must aware about publication. It can bring you from one spot to other place.
